

# PONDICHERRY ENGINEERING COLLEGE, PUDUCHERRY – 605 014

## CURRICULUM AND SYLLABI FOR AUTONOMOUS STREAM

### M.TECH. (INFORMATION TECHNOLOGY) COURSES

(FOR STUDENTS ADMITTED FROM ACADEMIC YEAR 2015-16 ONWARDS)

### CURRICULUM<sup>a</sup>

#### I SEMESTER

| Subject Code         | Subjects                                | Category | Periods |   |   | Marks # |    |     | Credits   |
|----------------------|---|----------|---------|---|---|---------|----|-----|-----------|
|                      |   |          | L       | T | P | CA      | SE | TM  |           |
| IT151                | Advanced Data Structures and Algorithms | TY       | 3       | 1 | 0 | 40      | 60 | 100 | 4         |
| IT152                | Advanced Computer Architecture          | TY       | 3       | 1 | 0 | 40      | 60 | 100 | 4         |
| IT153                | Advanced Operating System               | TY       | 3       | 1 | 0 | 40      | 60 | 100 | 4         |
| IT154                | Advanced Databases                      | TY       | 3       | 1 | 0 | 40      | 60 | 100 | 4         |
|                      | Elective-I                              | TY       | 3       | 1 | 0 | 40      | 60 | 100 | 4         |
|                      | Elective-II                             | TY       | 3       | 1 | 0 | 40      | 60 | 100 | 4         |
| IT155                | Advanced Software Laboratory-I          | LB       | -       | - | 3 | 60      | 40 | 100 | 2         |
| <b>Total Credits</b> |   |          |         |   |   |         |    |     | <b>26</b> |

#### SEMESTER-II

| Subject Code         | Subjects                        | Category | Periods |   |   | Marks # |    |     | Credits   |
|----------------------|---------------------------------|----------|---------|---|---|---------|----|-----|-----------|
|                      |                                 |          | L       | T | P | CA      | SE | TM  |           |
| IT156                | Network Security                | TY       | 3       | 1 | 0 | 40      | 60 | 100 | 4         |
| IT157                | Design of Web Services          | TCM      | 3       | 0 | 2 | 50      | 50 | 100 | 4         |
|                      | Elective –III                   | TY       | 3       | 1 | 0 | 40      | 60 | 100 | 4         |
|                      | Elective –IV                    | TY       | 3       | 1 | 0 | 40      | 60 | 100 | 4         |
|                      | Elective –V                     | TY       | 3       | 1 | 0 | 40      | 60 | 100 | 4         |
|                      | Elective –VI                    | TY       | 3       | 1 | 0 | 40      | 60 | 100 | 4         |
| IT158                | Advanced Software Laboratory-II | LB       | -       | - | 3 | 60      | 40 | 100 | 2         |
| IT159                | Research Methodology            | PR       | -       | - | 3 | 100     | -  | 100 | 1         |
| <b>Total Credits</b> |                                 |          |         |   |   |         |    |     | <b>27</b> |

<sup>a</sup> Approved in 3<sup>rd</sup> Academic Council Meeting

**SEMESTER-III**

| Subject Code         | Subjects        | Category | Periods |   |   | Marks # |     |     | Credits  |
|----------------------|-----------------|----------|---------|---|---|---------|-----|-----|----------|
|                      |                 |          | L       | T | P | CA      | SE  | TM  |          |
| IT160                | Project Phase I | PR       | -       | - | - | 150     | 150 | 300 | 9        |
| <b>Total Credits</b> |                 |          |         |   |   |         |     |     | <b>9</b> |

**SEMESTER-IV**

| Subject Code         | Subjects                         | Category | Periods |   |   | Marks # |     |     | Credits   |
|----------------------|----------------------------------|----------|---------|---|---|---------|-----|-----|-----------|
|                      |                                  |          | L       | T | P | CA      | SE  | TM  |           |
| IT161                | Project Phase II                 | PR       |         |   |   | 200     | 200 | 400 | 14        |
|                      | Professional Development Courses | PR       |         |   |   | 200     | -   | 200 | 2         |
| <b>Total Credits</b> |                                  |          |         |   |   |         |     |     | <b>16</b> |

A representative list of *Professional Development Courses* is given below:

- a. Industrial Training (*Limited to one credit*)
- b. Specific Field Knowledge Training
- c. Seminar related with directed study
- d. Paper Publication in SCI Journals (*Limited to one credit*)
- e. Paper Publication in reputed Conference.

# **CA** – Continuous Assessment, **SE** – Semester Examination, **TM** – Total Marks

\* **TY** – Theory, **TCM** – Theory with a Mini Project, **LB** – Laboratory, **PR** - Practice

### LIST OF ELECTIVES

| Sl. No. | Subject Code | Subjects                               | Category |
|---------|--------------|--|----------|
| 1       | ITE51        | Soft Computing                         | TY       |
| 2       | ITE52        | Wireless Sensor Networks               | TY       |
| 3       | ITE53        | Software Quality Management            | TY       |
| 4       | ITE54        | Meta Heuristic Optimization            | TY       |
| 5       | ITE55        | Ontology and Semantic Web              | TY       |
| 6       | ITE56        | Knowledge Engineering                  | TY       |
| 7       | ITE57        | Biometrics                             | TY       |
| 8       | ITE58        | Image and Video Coding                 | TY       |
| 9       | ITE59        | Compiler Construction and Optimization | TY       |
| 10      | ITE60        | Software Project Management            | TY       |
| 11      | ITE61        | Speech Processing                      | TY       |
| 12      | ITE62        | Multimedia Systems                     | TY       |
| 13      | ITE63        | Pervasive Computing                    | TY       |
| 14      | ITE64        | Big Data Analytics                     | TY       |
| 15      | ITE65        | Business Intelligence                  | TY       |
| 16      | ITE66        | Software Requirements Engineering      | TY       |
| 17      | ITE67        | Machine Learning Techniques            | TY       |
| 18      | ITE68        | Information Retrieval Techniques       | TY       |
| 19      | ITE69        | Ad hoc and Sensor Networks             | TY       |
| 20      | ITE70        | Web Data Mining                        | TY       |
| 21      | ITE71        | Network Engineering and Management     | TY       |

## **SYLLABUS (Core Subjects)**

| <b>Department</b> : Information Technology  |   |                            |   | <b>Programme</b> : M.Tech. (Information Technology) |        |                        |    |     |
|---|---|----------------------------|---|---|--------|------------------------|----|-----|
| <b>Semester</b> : One   |   |                            |   | <b>Category</b> : TY                                |        |                        |    |     |
| Subject Code  | Subject   | Hours / Week               |   |   | Credit | Maximum Marks          |    |     |
|   |   | L                          | T | P   | C      | CA                     | SE | TM  |
| IT151   | Advanced Data Structures and Algorithms   | 3                          | 1 | 0   | 4      | 40                     | 60 | 100 |
| <b>Prerequisite</b>   | -   |                            |   |   |        |                        |    |     |
| <b>Objective</b>  | <ul style="list-style-type: none"> <li>To extend the students' knowledge in data structures and algorithms with advanced topics</li> <li>To develop students to select and design appropriate data structures and algorithms to solve complex problems</li> </ul>       |                            |   |   |        |                        |    |     |
| <b>Outcome</b>  | <ul style="list-style-type: none"> <li>Ability to analyze algorithms and to determine algorithm correctness</li> <li>Mastering a variety of advanced data structures and their implementations</li> <li>Apply suitable design strategies for problem solving</li> </ul> |                            |   |   |        |                        |    |     |
| <b>UNIT – I</b>   | <b>Algorithm Analysis</b>   |                            |   |   |        | <b>Hours: 12</b>       |    |     |
| Mathematical Proof Techniques: Induction, Proof By Contradiction, Direct Proofs – Asymptotic Notations – Properties Of Big O Notation – Conditional Asymptotic Notation – Algorithm Analysis – Amortized Analysis – Introduction To NP Hard, NP Completeness – Recurrence Equations – Solving Recurrence Equations – Time / Space Trade Off.  |   |                            |   |   |        |                        |    |     |
| <b>UNIT – II</b>  | <b>Heap structures</b>  |                            |   |   |        | <b>Hours: 12</b>       |    |     |
| Min / Max Heaps – DEPQ – Liftist Trees – Binomial Heaps – Fibonacci Heaps – Skew Heaps – Pairing Heaps – Interval Heaps   |   |                            |   |   |        |                        |    |     |
| <b>UNIT – III</b>   | <b>Advanced Tree structures</b>   |                            |   |   |        | <b>Hours: 12</b>       |    |     |
| Binary Search Trees – AVL Trees – Red Black Trees – Multi Way Search Trees – B Trees – Splay Trees – Tries  |   |                            |   |   |        |                        |    |     |
| <b>UNIT – IV</b>  | <b>Multi-Dimensional Data Structures</b>  |                            |   |   |        | <b>Hours: 12</b>       |    |     |
| Segment Trees – K-D Trees – Point Quad Trees – MX Quad Trees – R Trees – TV Trees   |   |                            |   |   |        |                        |    |     |
| <b>UNIT – V</b>   | <b>Geometric Structures</b>   |                            |   |   |        | <b>Hours: 12</b>       |    |     |
| 1-Dimensional Range Searching – Line Segment Intersection – Convex Hulls – Computing Overlay of Two Subdivisions – Range Trees – Voronoi Diagram  |   |                            |   |   |        |                        |    |     |
| <b>Total Contact Hours: 45</b>  |   | <b>Total Tutorials: 15</b> |   | <b>Total Practical Classes:</b>                     |        | <b>Total Hours: 60</b> |    |     |
| <b>Text Books:</b>  |   |                            |   |   |        |                        |    |     |

| <b>Objective</b>   | <ul style="list-style-type: none"> <li>To understand the advances in Computer Architecture</li> <li>To understand the Parallel Programming Platforms</li> </ul>                                    |                            |          |   |               |                      |                        |           |
| <b>Outcome</b>   | <p>On completion of the course, the students are able to</p> <ul style="list-style-type: none"> <li>To exploit the parallel programming platforms.</li> <li>To write efficient programs</li> </ul> |                            |          |   |               |                      |                        |           |
| <b>UNIT – I</b>  | <b>Introduction</b>  |                            |          |   |               |                      | <b>Hours: 12</b>       |           |
| Need of High Speed Computing – Increase the Speed of Computers – History of Parallel Computers and Recent Parallel Computers; Solving Problems in Parallel – Temporal Parallelism – Data Parallelism – Comparison of Temporal and Data Parallel Processing – Data Parallel Processing with Specialized Processors – Inter-Task Dependency. The Need for Parallel Computers - Models of Computation - Analyzing Algorithms –Expressing Algorithms.  |  |                            |          |   |               |                      |                        |           |
| <b>UNIT – II</b>   |  |                            |          |   |               |                      | <b>Hours: 12</b>       |           |
| <b>Parallel Programming Platforms:</b> Trends in Microprocessor Architectures - Limitations of Memory System Performance – Parallel Computing Platforms – Communication Costs in Parallel Machines – Routing Mechanisms for Interconnection Networks.  |  |                            |          |   |               |                      |                        |           |
| <b>Principles of Parallel Algorithm Design:</b> Preliminaries – Decomposition Techniques – Characteristics of Tasks and Interactions – Mapping Techniques for Load Balancing – Methods for Containing Interaction Overheads – Parallel Algorithm Models.   |  |                            |          |   |               |                      |                        |           |
| <b>Basic Communication Operations:</b> One-to-All Broadcast and All-to-One Reduction – All-to-All Broadcast Reduction – All-Reduce and Prefix-Sum Operations – Scatter and Gather – All-to-All Personalized Communication – Circular Shift – Improving the Speed of Some Communication Operations.   |  |                            |          |   |               |                      |                        |           |
| <b>UNIT – III</b>  | <b>Analytical Modeling of Parallel Programs:</b>   |                            |          |   |               |                      | <b>Hours: 12</b>       |           |
| Sources of Overhead In Parallel Programs – Performance Metrics For Parallel Systems – Scalability Of Parallel Systems – Minimum Execution-Time and Minimum Cost-Optimal Execution Time - Programming Using the Message-Passing Paradigm: Principles of Message-Passing Programming – Building Blocks – MPI – Topologies and Embedding – Overlapping Communication with Computation – Collective Communication and Computation Operations – Groups and Communicators-Programming Shared Address Space Platforms: Thread Basics – Synchronization Primitives in threads – Controlling Thread and Synchronization Attributes – Composite Synchronization Constructs – Tips for Designing Asynchronous Programs – Open MP. |  |                            |          |   |               |                      |                        |           |
| <b>UNIT – IV</b>   |  |                            |          |   |               |                      | <b>Hours: 12</b>       |           |
| <b>Dense Matrix Algorithms:</b> Matrix-Vector Multiplication – Matrix-Matrix Multiplication – Solving A System of Linear Equations – FFT.  |  |                            |          |   |               |                      |                        |           |
| <b>Sorting:</b> Issues in Sorting on Parallel Computers – Sorting Networks – Bubble Sort and Its Variants – Quick sort – Bucket and Sample Sort – Other Sorting Algorithms.  |  |                            |          |   |               |                      |                        |           |
| <b>Graph Algorithms:</b> Definitions and Representation – Minimum Spanning Tree – Single-Source Shortest Paths – All-Pairs Shortest Paths.   |  |                            |          |   |               |                      |                        |           |
| <b>UNIT – V</b>  |  |                            |          |   |               |                      | <b>Hours: 12</b>       |           |
| <b>Search Algorithms for Discrete Optimization Problems:</b> Definitions and Examples, Sequential Search Algorithms, Search Overhead Factor, Parallel Depth-First Search, Parallel Best-First Search, Speedup Anomalies In Parallel Search Algorithms- <b>Dynamic Programming:</b> Overview.   |  |                            |          |   |               |                      |                        |           |
| <b>Total Contact Hours: 45</b>   |  | <b>Total Tutorials: 15</b> |          | <b>Total Practical Classes:</b>                     |               |                      | <b>Total Hours: 60</b> |           |
| <b>Text Books:</b>   |  |                            |          |   |               |                      |                        |           |

| <b>ITE52</b>   | <b>Wireless Sensor Networks</b>   | <b>3</b>                   | <b>1</b> |                                   | <b>3</b>      | <b>40</b>              | <b>60</b> | <b>100</b> |
| <b>Prerequisite:</b>   | <b>Computer Networks</b>  |                            |          |                                   |               |                        |           |            |
| <b>Objective:</b>  | <p>1. To understand the fundamentals of wireless sensor networks and its application to critical real time scenarios.</p> <p>2. To study the various protocols at various layers and its differences with traditional protocols.</p> <p>3. To understand the issues pertaining to sensor networks and the challenges involved in managing a sensor network.</p> |                            |          |                                   |               |                        |           |            |
| <b>Outcome:</b>  | <p>1. Technically knowing in building a WSN network.</p> <p>2. Analysis of various critical parameters in deploying a WSN</p>   |                            |          |                                   |               |                        |           |            |
| <b>UNIT – I</b>  | <b>Wireless LANs and PANs:</b> fundamentals of WLANs, IEEE 802.11 standard, HIPERLAN standard, Bluetooth. Wireless WANs and MANs: Wireless in Local Loop, Wireless ATM, IEEE 802.16 standard, Wireless Internet: Mobile IP , TCP in wireless domain.  |                            |          |                                   |               | <b>Hours: 12</b>       |           |            |
| <b>UNIT – II</b>   | <b>Wireless Sensor Networks:</b> Introduction, Sensor Network Architecture, Data Dissemination, Data Gathering, Location Discovery, Quality of a Sensor Network , Evolving standards, Other Issues  |                            |          |                                   |               | <b>Hours: 12</b>       |           |            |
| <b>UNIT – III</b>  | <b>Networking Sensors:</b> Key Assumptions, Medium Access Control, Geographic Energy Routing, Attribute-based routing. Infrastructure Establishment: Topology control, clustering, Time synchronization, Localization and Localization services.  |                            |          |                                   |               | <b>Hours: 12</b>       |           |            |
| <b>UNIT – IV</b>   | <b>Ad hoc wireless Networks:</b> Introduction, Issues in ad hoc wireless networks, Issues in designing a routing protocol, classification of routing protocols, table-driven, on-demand, hybrid, flooding, hierarchical, and power aware routing protocols.   |                            |          |                                   |               | <b>Hours: 12</b>       |           |            |
| <b>UNIT – V</b>  | <b>QoS and Energy Management :</b> Issues and Challenges in providing QoS, classifications, MAC, network layer solutions, QoS frameworks, need for energy management, classification, battery, transmission power, and system power management schemes.   |                            |          |                                   |               | <b>Hours: 12</b>       |           |            |
| <b>Total Contact Hours: 45</b>   |   | <b>Total Tutorials: 15</b> |          | <b>Total Practical Classes: 0</b> |               | <b>Total Hours: 60</b> |           |            |
| <b>Reference Books:</b>  |   |                            |          |                                   |               |                        |           |            |

| <b>Outcome:</b>  | <p>Upon completion of the course the students should be able to:</p> <ul style="list-style-type: none"> <li>• Identify and describe high speed networking protocols and the various network architectures.</li> <li>• Recognize the feasibility of applying congestion and traffic management in a network.</li> <li>• Apply TCP and ATM congestion control techniques.</li> <li>• Implementation of protocols for QOS</li> </ul>                           |                            |   |                                   |        |               |                        |     |
| <b>UNIT – I</b>  | <b>HIGH SPEED NETWORKS</b><br>Frame Relay Networks – Asynchronous transfer mode – ATM Protocol Architecture, ATM logical Connection, ATM Cell – ATM Service Categories – AAL. High Speed LAN's: Fast Ethernet, Gigabit Ethernet, Fibre Channel – Wireless LAN's.  |                            |   |                                   |        |               | <b>Hours: 12</b>       |     |
| <b>UNIT – II</b>   | <b>CONGESTION AND TRAFFIC MANAGEMENT</b><br>Queuing Analysis- Queuing Models – Single Server Queues – Effects of Congestion – Congestion Control – Traffic Management – Congestion Control in Packet Switching Networks – Frame Relay- Congestion Control.  |                            |   |                                   |        |               | <b>Hours: 12</b>       |     |
| <b>UNIT – III</b>  | <b>TCP AND ATM CONGESTION CONTROL</b><br>TCP Flow control – TCP Congestion Control – Retransmission – Timer Management – Exponential RTO back-off – KARN's Algorithm – Window management – Performance of TCP over ATM. Traffic and Congestion control in ATM – Requirements – Attributes – Traffic Management Frame work, Traffic Control – ABR traffic Management – ABR rate control, RM cell formats, ABR Capacity allocations – GFR traffic management. |                            |   |                                   |        |               | <b>Hours: 12</b>       |     |
| <b>UNIT – IV</b>   | <b>INTEGRATED AND DIFFERENTIATED SERVICES</b><br>Integrated Services Architecture – Approach, Components, Services- Queuing Discipline, FQ, PS, BRFQ, GPS, WFQ – Random Early Detection, Differentiated Services.   |                            |   |                                   |        |               | <b>Hours: 12</b>       |     |
| <b>UNIT – V</b>  | <b>PROTOCOLS FOR QoS SUPPORT</b><br>RSVP – Goals & Characteristics, Data Flow, RSVP operations, Protocol Mechanisms – Multiprotocol Label Switching – Operations, Label Stacking, Protocol details – RTP – Protocol Architecture, Data Transfer Protocol, RTCP.   |                            |   |                                   |        |               | <b>Hours: 12</b>       |     |
| <b>Total Contact Hours: 45</b>   |   | <b>Total Tutorials: 15</b> |   | <b>Total Practical Classes: 0</b> |        |               | <b>Total Hours: 60</b> |     |
| <b>Text Books:</b>   |   |                            |   |                                   |        |               |                        |     |
